

Dental ethics

الاستاذ الدكتور حيدر دخیل المعلا

دكتوراه بورء جراحة الفم والوجه والفکین

زمیل كلية الجراحین الملكية البريطانية کلاسکو

شهادة تدرب من مستشفى كلية برستول الملكية البريطانية

شهادة تدرب من مستشفى كلية شاريتة الألمانية

عضو المجلس العراقي لجراحة الوجه و الفکین

عضو المجلس العربي لجراحة الوجه و الفکین في العراق

What is meant by ethics ?
Why are ethics important?

Evolution and philosophy of ethics.
The terms moral and ethical.
Obligation and principle.

Medical Ethics.

deals with the **right choices of conduct** considering all the **سلوك في اختيار الخيار الصحيح** circumstances.

It deals with the **distinction** **التمييز** between what is **considered right or wrong** at a **given time** in a given culture.

Medical ethics is concerned with the **obligations of the doctors** and the **التزام** **hospital** to the patient along with other **health professionals** and **society**.

Ethics

is an **intrinsic component** الشعور الذاتي of dental practice.

Every day dentists are faced with situations that call for **ethical judgment** and **behavior**.

They raise questions about the **behavior** and **decision-making** of dentists – **not scientific** or technical questions such as **how to apply a local anaesthetic** or **extract an impacted wisdom tooth**, but questions about **values**, rights and responsibilities.

Dentists face these **kinds of questions** just as often as scientific and technical ones.

Medical Ethics

is concerned with **studying** and/or **building up** a coherent set of “**rules**” or **principles** by which people **ought to (like) live**.

It is the **social value** which **binds** the society by **uniform opinion** / consideration and enables the **society to decide what is wrong and what is right**. It is the **science of morale** concerning **principle of human duty in the society**.

Why are ethics important ?

the importance of ethics **cannot be overstated**
(exaggeration) **Upholding (perform) ethical principles** promotes **trust,**

respect,

fairness (exact) and

social responsibility

which are essential for building strong
relationships, achieving **success**, and creating a
better world.

individuals and organizations.

navigate (transform) the challenges of today's world, it is crucial (difficult) to **prioritize ethics** and make decisions that **align with moral principles**.

When most people think of ethics (or morals), they think of rules **for distinguishing** between right and wrong, such as the **Golden Rule**.

Ethics include

Moral. الاخلاق العامة

Honesty. امين

Honor. فخر

Conscience. ضمير

Choice. خيار

Integrity. نزاهة

Fairness. انصاف

Value. قيمة

Principles. مبادئ

Right. حق

Responsibility. المسؤولية

Why study dental ethics ?

As long as the dentist is a **knowledgeable** and **skillful clinician**, **ethics doesn't matter**.

“**Ethics** is learned in the **family** and or **in dental school**.

Dental ethics is learned by **observing how senior dentists act**, not from books or lectures.

These are some of the **common reasons** given for not **assigning** (help) ethics a major role in the dental school.

Evolution and philosophy of ethics.

Evolutionary ethics

is a field of inquiry (ask question) that explores how **evolutionary theory** might bear on our understanding of **ethics** or **morality**.

The range of issues (questions) investigated by evolutionary ethics is quite **broad**.

Supporters of evolutionary ethics have **claimed** (**reposed**) that it has **important implications** in the fields of descriptive ethics,
normative ethics,
metaethics.

Descriptive evolutionary ethics.

consists of **biological** approaches to **morality** based on the **alleged role** of evolution in shaping human **psychology** and **behavior**.

Such approaches may be based in scientific fields such as evolutionary psychology, sociobiology, or ethology (behavior), and seek to **explain certain human moral behaviors, capacities (values) , and tendencies (directions)** in evolutionary terms.

For example, the nearly **universal belief** that **incest (consider) is morally wrong** might be explained as an **evolutionary adaptation** that **furthered human survival**.

Normative (or **prescriptive**) evolutionary معياري ethics.

by contrast, seeks not to explain moral behavior, but to justify or (**explain**)debunk certain normative ethical theories or claims.

مطالبات

For instance,

some proponents (publishers)of **normative evolutionary ethics** have argued يجادل

that **evolutionary theory undermines** certain widely held views of humans' moral superiority over other animals.

Evolutionary meta ethics.

asks how evolutionary theory bears on theories of ethical discourse , حوار
the question of whether objective موضوعي
moral values exist, and the possibility of objective
moral knowledge.

For example, some evolutionary ethicists have
appealed to evolutionary theory to defend various
forms of moral anti-realism عكس الواقعية
, that objective قسوة , roughly المطالبة (the claim
moral facts do not exist) and moral skepticism
الشك.

The terms moral and ethical.

the terms ethics and morality are used interchangeably, although a few different communities (academic, legal, or religious, for example) will occasionally make a distinction تميز.

Ethics and morals relate to “right” and “wrong” conduct سلوك. While they are sometimes used interchangeably, they are different: ethics refer to rules provided by an external source, e.g., codes of conduct in workplaces or principles in religions.

Morals refer to an individual’s own principles regarding right and wrong.

Obligation and principle.

Ethical obligation التزام or **duty** واجب .

an **ethical duty** or **obligation** is a **moral requirement** to follow a certain course of action that is **to do** or **refrain** يمتنع from doing certain things.
