عضو المجلس العربي لجراحة الوجه و الفكين في العراق

Professional Ethics review

Dental ethics **professionalism, human right** and **law**.

Right and law.

What is a profession ?

What is a professional ?

What is a professionalism ?

Dentistry as a profession.

Dentistry , the commercial picture.

Dentistry , the normative picture.

The content of professional obligation.

Dental Ethics , Professionalism , Human Rights

مهني , حق انساني

Dentistry has been a **recognized profession** for less than **two centuries**.

Previously it **overlapped** with **medicine** and so the origins of dental ethics can be found in **traditional medical ethics**.

Ethics has been **an integral part of medicine** at least since the time of **Hippocrates**, the **fifth century B.C.E.** (before the Christian era).

Greek physician who is regarded as a **founder** of medical ethics

Dental ethics human right and law.

In **recent times** both **medical ethics** and **dental ethics** have been **greatly influenced** by **developments** in **human rights**.

In a **multicultural** world, with many different **moral traditions**,

the major **international human rights** agreements can **provide a foundation for dental ethics** that is **acceptable** across **national** and **cultural boundaries** .

خارج حدود الوطنيه و الثقافيه.

Moreover, **dentists** sometimes have to **deal** with **dental problems** resulting from **violations** انتهاك of **human rights**, such as **forced migration** and **torture** التهجير القسري و.

تعذيب

They are greatly **affected** by the **debate** مناظره over whether **health care** رعاية صحية is **a human right**, حقوق الانسان

since the answer to this question in any particular country determines to **a large extent** who has **access to dental care**.

Dental Ethics and Law

Dental ethics is also **closely related** to **law**.

In most **countries** there are **laws** that يحدد specify how dentists are **required to deal with ethical issues** in patient **care** and **research**.

In addition, the **dental licensing** and regulatory **officials** in each country and can do **punish** dentists for **ethical violations**.

الانتهاكات الأخلاقية

What are the differences between
dental ethics and **law**?

the requirements of dental ethics and law are **similar**.

But ethics should **not be confused** with **law**. . خلط

1. **laws** can differ significantly from one country to another while **ethics** is **generally applicable across national boundaries**.

2. **Ethics** quite often prescribes **higher standards of behaviour** than does the law, and occasionally **situations may arise** where the two **conflict**.

صراع

In such circumstances dentists must use their **own best judgment** whether to **comply** الامتثال with **the law** or follow **ethical principles**.

Where **unjust laws** صراع بين القوانين الظالمة **conflict** with **ethical principles**, dentists should work **individually** and **collectively** **to change the laws**.

Should we care more about being **legal** or being **ethical**?

A profession مهني

A Profession is **a disciplined** مجموعه منضبطه
group of individuals who **adhere** to **ethical**
standards and **who** are **accepted by** the **public** as
possessing special **knowledge** and **skills** in a
widely recognised body of learning derived
from **research**, **education** and **training** at a **high**
level, and **who** are prepared to **apply this**
knowledge and **exercise** these **skills** in the interest
of others.

To improve **professionalism**.

1. individuals must **focus on improving** in each of the **mentioned areas**.

2. They can also display professionalism by being **kind** and **polite** to **everyone**, **presenting a professional image** in their **attitude** and address,

سلوك عنوان

3. showing up for work or **meetings fully prepared**.

Professional .

Is not **label** you give your self .

ليس كلام فقط

it is **a descriptive** you hope others will apply you.

ما تتمناه من الاخرين ان يعاملوك به

Dentistry as a profession

تجاري The **commercial picture**

1. The **commercial picture** the patient's needs and improved **well-being play** only a secondary role in the dentist's judgments about which services to offer a patient.

المريض بحاجه لاثبات القرار المريح في تقديم العلاج

2 . The codes of ethics that **organizations** frequently publish are **simply marketing devices**. They are aimed at **bringing increased numbers** of patients to the groups' members.

3. Each dentist is committed to use their power in such a way as to **secure the well-being** of the people whom they serve rather than **placing their own personal well-being** ahead of that of their patients.

يلتزم بخدمة المريض برضى تام واكثر

4. Dentists have **broad responsibilities** that include their **legal obligations** and **obligations** arising from **التزامات ethical** their **commitments** to **patients**, to **society** and to **professional ideals** .

المثال العادى

5. **Dental care** is not **viewed** simply as a **product** to be **sold** and **bought**.

Dental care is taken to have **objective value**, **قيمه موضوعيه** to be **important** to **people's well-being**, whether a given individual happens to value it or not. It is **related to people's ability to function in a proper and healthy way** and **to minimizing their pain and discomfort**.

Professional obligations of the dentist.

May vary from one country to another; however commonly **shared moral values** and **ethical responsibilities** include the duty to:

1. **Recognize, promote and uphold fundamental rights** **حقوق الإنسان الأساسية** human and the **rights of their patients** **حقوق المريض الإنسانية**

2. **Represent, defend and advocate** for both the **oral health** needs and **best interests of patients and the public**;

3. Provide safe, quality, competent and fair oral healthcare to every patient.

امن و جوده و كفوء و عادل

4. Improve the oral health, and contribute يساهم
to the **general health and well-being of individual patients** and the **public** at large.

5. Maintain the role, good reputation and dignity of the profession.

سمعة و كرامة المهنة

**Do we really have
obligations to Patients.?**

التزام

Can dentistry be both **a business** and a **profession**.?

What are **codes of ethics**?

الرموز او المؤسسات التي تهتم بالأخلاقيات الطبية

National associations, study groups, special interest groups, and specialist colleges offer dentists **a code of ethics developed** to guide their members in appropriate behavior.

Examples:

1. **General Dental Council (U.K.)** The First Five Years:
A Framework for Undergraduate Dental Education.
2. **Association for Dental Education in Europe:**
Profile and Competences for the European Dentist
3. **Code of Ethics** | **American Dental Association**

Code of ethics

Ensures best interest of patients

What is meant by the best interest of our patients?

Acting in the **best interest** of another implies taking **certain steps or following certain rules** so that the **person and the human community** will **survive and potentially flourish** .

تعیش و تزدهر

if the patient **does not** wants his **best interest**.

الابويه

Paternalism: means the health care professional acts as **a parent** and makes decisions for the patient on the basis of what the **professional believes** is in the **best interest of the patient**.

Paternalism should never be **applied primarily** to benefit the **professional at the expense of the patient**.

Paternalism

Example of paternalism in dentistry:

Many dentists have been asked by a patient and have **refused to remove a healthy dentition** merely because.

the **patient believes** that **taking care of dentures** would be **easier than caring for their natural teeth.**

Thank you
